

# CI – Kata Workshop

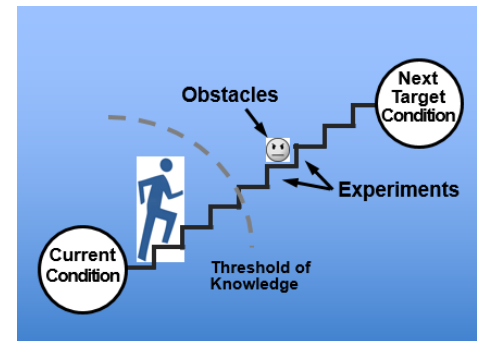

Services	Deliverables
▪ Kata Workshop	▪ 8-hour workshop for up to 18 participants

## Kata Workshop

Toyota Kata helps develop creative, scientific-thinking skills. Employees can use these skills to keep improving, adapting, and generating competitive advantage in a strategically-aligned way.

A fun hands-on interactive workshop showing how to remove obstacles one at a time in route towards achieving a larger target condition. We show this innovative method of engaging your managers, supervisors and team members with a standardized approach to Continuous Improvement that takes place while your process operates without occupying people in classrooms and creating long periods downtime on equipment. Once the standardized training is absorbed, we show how periodic coaching sessions take place to allow slow, methodical improvement towards company goals.

Using both classroom lecture and a manufacturing simulation, participants gain an understanding of Toyota Kata.

## At the completion of this workshop, participants will:

- Understand the benefits of Kata
- Know how Kata techniques can be applied in a manufacturing environment
- Be able to effectively participate in a Kata Event in their facility
- Have participated in a set of practice routines for learning to work scientifically
- Have observed a practice routine for how to reach the improvement Kata

## AKA Trainers will deliver the following learning activities and tools:

- Lecture with slide presentation
- Workbooks for participants
- Simulation and exercises
- Improvement Kata and Coaching Kata
- Discussion and interaction.

The company will provide the classroom and refreshments for participants and the AKA trainer.
