AKA's Corporate Director/Management Team-on-Loan

AKA's Management Team-on-Loan can include any of the pertinent senior level executives and/or managers necessary for sustainable productive manufacturing operational activities.

- Human Resources Mgr/Director
- Production Mgr/Director
- Operational Mgr
- Corporate Finance Mgr
- Corporate Executive Mgr
- Business Development Mgr
- Quality Mgr/Director
- Maintenance Mgr/Supervisor

However temporary in nature, the AKA Leadership Team-on-Loan can help your business with not only day-to-day issues but also implementing current best practices. These services are not workshops. These services are temporary embedment of an AKA executive-level professional within your business, providing your business with an on-site professional to act as one of your key managers, specific to your needs. If your business is experiencing a sudden vacancy, is in a transition phase, is growing at a rate beyond your current staff's capabilities, or simply has a need for someone to come in and implement the right "culture", AKA can provide help.

The AKA Leadership Team professional is temporarily embedded within your facility, physically working hand-in-hand with the senior level management team and employees alike, performing tasks, giving direction, empowering and holding workforce accountable, all while implementing programming, mentorship, coaching, and of course, training.

Benefits of Services:

- Alignment of systems and staff;
- Implementation of systems/programming that fits culture;
- In-depth training staff to implemented systems;
- Incorporating Best Practices within the workforce by example;
- Mentorship to others;
- Providing discipline to ranks;
- Consistent programming and procedures; and
- Assistance with identifying the training next level supervisors and management.

"We have great staff but no one experienced in installing the "system" that we needed to be successful. AKA's professional came in, installed the system then trained our staff to that system. Having someone of that level of expertise within our facility even only temporarily, helped show our team what was needed to take us to the next level."

Tom Wilson, President Phoenix Products
