VDA 6, Part 3:2016 – Establishing and Implementing

If your company is an automotive supplier to one of the German auto manufacturers, conducting internal audits in accordance with the VDA 6, Part 3 standard may be a requirement for you. This program includes the necessary education and training, consulting and implementation guidance needed to walk a company through a complete implementation of VDA 6, Part 3 the German Process Audit Standard.

While the implementation effort is dependent upon the size of the company, the number of processes and product lines, management support, and even multiple manufacturing locations, implementing a compliant VDA 6, Part 3 German Automotive Process Audit Program will typically take 5 - 7 days spread over several months when combined with other necessary internal audit programs (VDA 6, Part 3 Overview/ Management Review, Internal Auditor Training, Off-site support and an internal audit.) Deliverables typically include assistance with:

- 2 days identification of the context of the organization and its processes;
 - Understanding the organization and its context;
 - Understanding the needs and expectations of interested parties;
 - Determining the scope of internal audits;
 - Establishing the performance criteria for company processes.
- 3 - 5 days establishing internal audit checklists;
 - Matching the internal audit checklists against the company's processes;
 - Integrating the checklists into the current QMS

Give us a call today and let us walk you through the process of establishing and implementing VDA 6, Part 3, the German Automotive Quality Management Process Audit Standard.
