

ISO 14001:2015 Integration with ISO 9001:2015

| Services | Deliverables |
|--|---|
| <ul style="list-style-type: none">Integration of ISO 14001:2015 with ISO 9001:2015 (for Companies that currently are ISO 9001:2015 registered or in compliance)*** | <ul style="list-style-type: none">The man-days to provide this service requires a quotation – Time required is directly dependent on the structure of process controls and methodologies used to show process compliance. |

Full Integration ISO 14001:2015 and ISO 9001:2015

Integration of EMS and QMS has great economic as well as environmental controls that are applicable to the aspects of the process.

There are inherent effectiveness and cost savings with an integrated EMS and QMS. Efficiency can be achieved by:

1. Integrated assessment and surveillance audits by your CB (reduction in travel related cost and man-days to complete the audit);
2. One audit team covering both management systems;
3. One audit schedule for both management systems;
4. Common scope for registration;
5. Management Review Meeting covering both management systems;
6. Common documented information covering:
 - a. Internal audits;
 - b. Nonconformity and corrective actions;
 - c. Creating and updating;
 - d. Control of documented information, to name a few.

Benefits;

- Employees will have a better understanding about the interaction of their process and the environment;
- Better control of regulatory requirements;
- Clearer documented information about where and when environmental requirements occur.

This program is about integrating ISO 14001 into ISO 9001 and not vice versa.

Give us a call and let us walk you through the process of integrating ISO 14001:2015 with ISO 9001:2015.

***For this program to work, the Company must currently be registered or in compliance with ISO 9001:2015 and in compliance with State and Federal environmental regulations. It is not necessary for a Company to be registered to ISO 14001 for this program of work.
