## Supply Chain Risk Assessment Workshop

A company's supply chain can be a volatile environment, especially if disaster strikes within its' parameters. The APICS Supply Chain Council defines Supply Chain Risk Assessment as *"The systematic identification, assessment, and quantification of potential supply chain disruptions with the objective to control exposure to risk or reduce its negative impact on supply chain performance."*

It is certainly wise for a company to assess the impact of risk on their supply Base, and with this in mind, AKA/MEP has created this workshop based upon the importance of Supply Chain risk management and assessment principles.

This workshop utilizes classroom teaching, case study review, participant interaction in the form of the development of a plan for their organization.

Sufficient time is allowed for discussion of topics and questions.

### Potential benefits of this workshop are:

#### Strategic Benefits

- Achieve a competitive advantage (by turning a threat into an opportunity)
- Protection of brand name and customer satisfaction
- Ensure continuity of supply through a controlled, predictable response
- De-risk revenue and time to market goals

#### Tactical Benefits

- Avoidance of supply chain costs (buy aheads, expedites, emergency sourcing, premium freight)
- Reduce the number of supply crises
- Improve supplier delivery performance
- Improve supply chain asset utilization and inventory turns
- Reduce inventory

*Do you know the capabilities of your suppliers?*
