Gap Analysis

The Gap Analysis identifies the 'gaps' of the current health and safety programs and management systems as compared to the requirements of the standard. This process provides a road map to conformance by identifying actions needed for a successful certification.

"Ensuring safety is a key to continued success"

System Development

- Initial Launch Meeting
- Training of Key Personnel
- Determination of Procedures/Processes Required
- Determination of Forms/Inspections Required
- Determination of Hazard Analysis Methodology
- Monthly Action List Development
- Monthly Progress Review Meetings
- Formal Management Review

System Implementation

- Document Preparation
- Hazard Determination Assistance
- Internal Audits
- Internal Auditor Training
- Employee Training
- Monitoring and Measurement Assistance
- Management of Change Assistance

The Facilitation includes on-site assistance during the initial certification audit and, if desired, can extend to assisting with audit responses required for closure of the initial certification audit.
