

Fall Protection 101

Services	Deliverables
▪ Fall Protection Work Shop	▪ 4-hour workshop for up to 5 to 20 participants.

Fall Protection Work Shop

This four-hour interactive workshop is intended to inform employees of basic guidelines and methods employed for a 100% fall protection program. It reviews elements of fall hazards, fall hazard evaluation, and fall hazard control. This training references applicable OSHA requirements and other pertinent information. Real life case studies and lessons learned are presented to illustrate the “why” and the “need” for compliance and following OSHA requirements and industrial best practices.

“An Ounce of Prevention...”

It is intended as an essential guide for employees working on or around equipment that is off the ground. The course provides quick, expert advice on the most critical workplace safety issues caused by falls, according to OSHA Standard 1926.500.

Upon completion of the workshop an operator will know:

- The dangers of falls from their job.
- How to keep themselves safe.
- How to ensure their fellow workers are safe.

The company will provide the classroom and refreshments for participants and the AKA trainer.
