## Using Minitab 17 Software

Minitab Software is being used by Quality and Six Sigma professionals and offers a reliable platform for data analysis. This eight-hour workshop takes participants from a beginner's viewpoint and navigates through a more advanced level by using actual data sets. **Note: It is important that participants have a reasonable command of Advanced Statistics and data analysis prior to taking this class.**

This workshop is directed toward Belt candidates but is applicable to persons working in various Continuous Improvement roles, Quality Assurance situations, or Engineering related functions that deal with data on a regular basis. This workshop also features the use of Microsoft Excel Software and demonstrates the combined use of both software packages to get data in the best format for analysis.

### The Advantage Kentucky Alliance trainer will deliver the following learning activities and tools:

- Lecture with overheads
- Data sets and learning aids
- Practical examples
- Discussion interaction
- Questions and answers

### Upon completion of the workshop participants will understand:

- The structure of the Software
- The best use of graphics
- How to make graphics more meaningful
- The use of the Hypothesis Testing Roadmap
- How to access various Quality Tools
- How to use specific Engineering Tools

The company will provide the classroom and refreshments for participants and the AKA trainer.
